

ON DEMAND LEARNING PLATFORM

California CASA Association continuously strives to provide better support, resources, and training to help high-quality programs across our state serve children's best interests. With that goal in mind, we are excited to announce the official launch of our On Demand Learning Platform - CollaborNation!

As you know, volunteers are required to complete 12 hours of in-service training each year. California CASA wants to make this as easy as possible to complete by offering dozens of training opportunities on a range of different topics and styles on demand on our new learning platform.

The step-by-step guide below outlines how you can register and access on demand learning courses that will count towards your 12 hours of in-service training.

If you have any questions or need any support with signing up, please reach out to Gabi Magallon
